Objectives of a Simulation Exercise

1) Present a simplified abstraction of the essential elements of a problem;

2) Make explicit the essential relations and fundamental interactions in a situation;

3) Give the student a position in the situation, so that the student involve in the decision-making;

The most significant advantage of simulation exercise is enable student to participate in the present situation. The fundamental characteristic that will enable student to make decisions on situations that normally would develop over a longer period of time.

In simulation exercise the students become "actors in a play," assuming roles which reflect a real situation or experience, and making decisions according to their respective roles.

The exercise should pursue the following goals:

1) Acquaint the students with the decision-making process in situations of uncertainty and in the presence of confused and inaccurate information.

2) Encourage students to make a critical analysis of information received concerning the given problem.

3) Develop the decision-making process.

4) Help the students to experience the pressure of having to make important decisions with low levels of information or with information from unreliable sources.

5) Interpret the law and analyse the same in the given situation.

6) Understand the importance of coordinated and cooperative decision-making.

7) Learn to think, advance planning and preparation.

Method

The simulation method is based on the students' own experience. Each student will have a clearly defined role that should be assigned to him at the beginning of the exercise and make decisions according to their respective roles.

Sample problem on simulation exercise -1

Bhushan is a Director of Pharmaceutical Company located at Bangalore. He represented the company in taking various projects. A new drug was found out by Research and Development department of Government of India for cancer. He wanted to go to Delhi to get the project of manufacturing drugs. Since his company had name and fame, in all probability he would have got this project. The Conference was to be held at Delhi on 22nd of March by 1.00 pm. He had planned to attend it and had taken a flight ticket for 22nd morning which charged Rs. 25,000/-. The flight was scheduled at 9.00 am. But it got delayed by 2 hours. Due the delay in reaching, the project was given to some other company. Bhushan sues The Kingfisher Airlines for the refund of ticket amount as well as for the compensation for not being able to get the contract.

Airlines reject this saying that they are not liable as the delay was due to some technical problem which was not within their control. Further they refuse to compensate the Company in failure to get project, as the claim is based on mere assumption. The matter is for negotiation.

Sample problem on simulation exercise -2

Abhijit Gupt an employee of Mysore Kirlosker Pvt. Ltd. succumbed to the massive cardiac arrest while returning home from the place of employment after completing his job. Subsequently, his wife Meena filed a claim petition under Workmen's Compensation Act after 21/5 year after the death, praying for grant of Rs. 12 lakhs compensation.

M/s Mysore Kirlosker vehemently opposes the claim on the following grounds:

i) the death of the employee has not occurred during/under the course of employment

ii) the cause of death is cardiac arrest and that too has happened elsewhere outside the premises and after the work hours

iii) the other legal heirs have not joined the petition as petitioners but have been made as respondents

iv) the claim is barred by limitation

Report

The college has decided to give skill development course on problem solving through simulation exercise, which would help the students to solve the problem in more innovative way.The students leant to understand the factual situations in the society and they tried to solve the problem involving themselves. The students learnt step by step how to solve the problem by following the instructions given by the teacher. All the students who participated in the course were very happy as they could learn practical skills. Students involved themselves in all the exercises very interestingly. The course helped the students to working constructively and also develop their practical skills.Around 70 students attended the course.
